- Patented Intelligent Interweave Print Technique (i²) helps eliminate banding
- Brilliant images using Eco Ultra solvent inks
- Mutoh Financial Services easy printer finance plans

Printing Qualities

Revolutionize how you make banners today. The 1204PLUS provides the ability to print on Mutoh's Ready2Print pre-grommated and pre-welded banner material for fast and easy sign production. No other wide format printer on the market today can do this. The ValueJet 1204PLUS employs a new 1440 dpi piezo print head. This piezo print head technology provides greater variable dot capability and is responsible for making the images really stand out and look really sharp. Mutoh's patented intelligent interweaving printing technique (i²) is standard on the ValueJet line. i² allows for increased print speeds and virtually eliminates banding, creating exceptional image quality. Its increased accuracy and consistency of dot size and dot release during printing improves the image, in addition to increased dot gain control, allowing for more latitude in profile settings.
