TESTIMONIAL

"VerteLith allows us to have a unified and simplified workflow between our MUTOH wide-format eco-solvent printer, cutter, and flatbed UV printer. There is true peace of mind knowing that all of our projects are organized and categorized in one place. VerteLith and our MUTOH equipment played a key role in our successful shop opening, and I'm sure they will continue to be a key part of Innovative Ink's success for many years to come."

- Ramon Herrera Co-founder/President Innovative Ink Signs & Printing

TESTIMONIAL

"We love the preview of the VerteLith RIP and the ease with which we can access and adjust layers and profiles. Our workflow for ADA Braille signs and other textured printing we do is definitely improved using this RIP with the Mutoh XpertJet 661UF printer. We are adding more depth and breadth to our product offerings thanks to the very high image quality the Mutoh printer provides to us. It has been a terrific investment and addition to our business."

- Michael Woodland, Co-Owner Fast Signs – Easton, PA

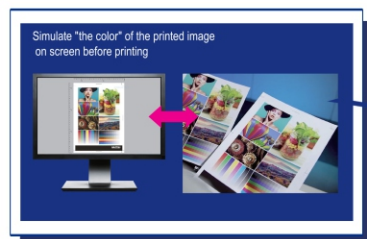

TESTIMONIAL

"VerteLith is a robust, proprietary RIP that is evolving every day to meet our customers' needs. Users enjoy a host of workflow and RIP features to help efficiency and profitability."

- Derek Moffett, MUTOH America, INC. Product Manager
